

Management Process Systems Limited

**CCM Service supports Hospitals NEC Contract Management
for Cox Project Management**

(London, 15 June 2010)

Management Process Systems Limited (MPS) of Cambridge today announced that their Contract Change Management (CCM) system, which supports the NEC form of contract, has been selected for three projects by Cox Project Management Ltd for client Salford Royal Hospital NHS Foundation Trust.

The CCM system manages the contract change processes set out in the NEC form of contract. The three projects are the £8.1m New Radiotherapy Centre, the £2.3m Maternity & Dermatology project, and the £1.7m Heart Care Unit. All are located at the Salford Royal University Teaching Hospital.

Derek Cox, Managing Director of Cox PM said, “the use of CCM to support the contract administration of three complex NHS projects has been welcomed by all concerned and has made a very positive contribution to the process.”

CCM is a three time construction industry award winning solution, and is the first UK implementation of Software as a Service (SaaS) to support the NEC. MPS hold the IBM Software Platinum Achievement Award as IBM Independent Software Vendor of the Year.

The Software-as-a-Service (SaaS) CCM system is delivered through an agreement with IBM for Server Managed Services. This agreement includes data centre, hardware equipment and software products, internet services, security and support services.

Robin Wilkin, Operations Director of MPS said, “Management Process Systems is recognised as the established industry leader in NEC contract management systems. CCM has been used on hundreds of projects in the UK, and, although the NEC contract is used widely across the infrastructure sector, it is now being used more and more in the building industry. We are very pleased that Cox Project Management has elected to use CCM for their building projects in the health sector.”

Editors Notes

Management Process Systems Limited is a management services company whose mission is to deliver innovative solutions that deliver identifiable business advantage to the construction industry. The company has extensive experience in the business processes, methodologies, information and knowledge requirements of the construction industry. This expertise and knowledge is re-enforced by a highly experienced capability to deploy Information Technology in support of business processes.

Information about MPS is at www.mpsprocess.com.

Contract Change Management (CCM) is an innovative and award winning British success story on the provision of IT support to a key business process. Thousands of construction industry professionals from most of the large UK PM, QS, Engineering, and Construction companies have been managing projects with CCM since 2001. These projects have managed over a million contract documents. A notable success has been the collaborative management of Early Warnings giving notification of new risks, and Compensation Events for notification of change.

Client customers include EDF Energy, Highways Agency, Environment Agency, Imperial College London, BBC Workplace, TfL, DEFRA, Metronet Rail (LUL), Welsh Assembly Government, Christchurch International Airport, several Local Authorities, and many more.
MPS are members of the NEC Users Group, Constructing Excellence, and the Association for Project Management.
MPS is an IBM Advanced Business Partner.

The University of the West of England (UWE) report 'Improving NEC Contract Change Management with CCM' from their Knowledge Transfer Partnership (KTP) research project showed that 84% of CCM Users consider it as a 'good' or 'excellent' system. Significant tangible savings and intangible benefits are described in this award winning report on the benefits of using the CCM collaborative support system in the Construction Industry.

PRESS RELEASE – 15.6.10

In the current economic climate our customers want to save money, preserve capital and reduce risk. CCM, as an SaaS service, contributes to these objectives by -

1. Increased productivity

Increasing workloads and shortages of skilled managers have led firms to maximise efficiency of their professional staff. CCM enables remote working, less travelling, and more effective use of key resources. Managers spend more time on decision making and less time on administration. They are also able to manage more projects.

2. Improved predictability of outcome (cost & time)

Predictability of cost and time are two of the top ten key performance measures for business excellence as identified by Constructing Excellence. CCM improves predictability, minimises surprises, facilitates speedy agreement of change, and provides very early close out of final accounts.

3. Reduced risk

CCM facilitates early warning of liabilities and opportunities, improved risk management, increased collaboration, and therefore better-informed decision making. CCM also improves contract management, which reduces the level of risk to all involved.

4. Compliance - Improved audit and visibility

CCM is a secure quality controlled system, which enables compliance in the most challenging and demanding environments. Process visibility and audit ability facilitate improved communications for all participants. Coupled with its ability to transcend location, CCM provides a powerful management tool for all members of the project team.
